

PRODUCT SPECIFICATION SHEET

Lever Fire Valves

TOP SPEC:

Comes In 3 Sizes

PAGE

1/1

Product Description

Lever Fire Valves work by tensioning the stainless cord so the valve lever is held open, the stainless cord is joined in the area of the boiler by a Eutectic Soldered Link, this link melts in the event of a fire, and the valve closes.

Lever Fire Valves are an economical and space-saving alternative to Drop-Weight / Free-Fall Fire Valves, and the same manual or electronic actuation switches can be used in the control cable.
