Product Description

Vent Cap For Heating Oil Tanks - 2" Male Bsp

This is a simple push-fit green polypropylene cap that slips onto the top of 2" BSP male threaded vent pipes and then secured with two screws.

Designed for above-ground heating oil storage tanks, their main function is to prevent everyday particles/debris from entering the tank and contaminating the fuel inside.

Main Features

- Connection size - Fits over 2" BSP Thread
- Secured by 2 screws
